Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is in response to communication filed on 3/24/05 in which claims 1, 25, 26, 37-38, 65-84, 87-95 and 100-109 are pending.

Double Patenting

2. Claims 1, 25-26, 37-38, 65-84, 87-95 and 100-109 of this application conflict with claims 1-51 of Application No. 09/728693. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

4. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 2141

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

5. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1,25, 26, 37-38, 65-84, 87-95 and 100-109 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-18 and 51-53 of copending Application No. 09/728693. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application encompasses the copending application No. 09/728693. The instant application further recites wherein communication network comprises the Internet and wherein the advertisement distribution server includes: a plurality of ad server, each of which stores one or more of the advertisement to be downloaded, each advertisement being stored in a storage location designated by a URI; the at least playlist server; and wherein the playlist contains a list of ad identifiers and corresponding URIs that identify respective ones of the advertisements to be downloaded and the corresponding storage location from which each respective advertisement function includes: a client device playlist identification function that transmit an identification of a current playlist currently being used by the client device to the at least one playlist server prescribed playlist check intervals, wherein the at least one playlist server responds either by transmitting to the client device an indication that the current playlist is valid and does not need to be augmented or by transmitting to the client device a new playlist.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

Claims 1, 25, 26, 37-38, 65-84, 87-95 and 100-109 would be allowable upon filing a terminal disclaimer to overcome the Double Patenting set forth in this Office action.

Conclusion
